MEMORANDUM FOR:

SUBJECT: Transcript of DCI's Appearance Before  
Senate Foreign Relations Committee on  
19 July 1965

Following are notes I have made on the 19 July 1965 briefing on the situation in the Dominican Republic:

On page 390 the Chairman inquired and the Director responded on the relationship of the FBI and the CIA. This should be excerpted and sent to the CI Staff.

On page 401 the second question by Senator Lausche appears possibly to be confused with the Director's answer. Perhaps  can straighten this out in the transcript we return to the Committee.

25X1

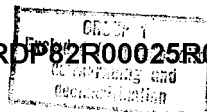

Page 404 has Senator Aiken's question about . In our memorandum to the Committee including this item the page reference should be noted.

25X1

On page 406 I note a question by Senator Aiken we probably should cover in our memorandum to the Committee and which I had not previously noted. This is his last remark on that page saying, "It would be interesting to know what is happening to the arsenal, the manufacturing plant."

At page 411 is the point where the history of communism in the Dominican Republic is introduced for the record, and our memorandum to the Committee should have the same warning note about this being a reconstruction that was put on the paper itself.
